

## Connecticut Digital Archive

The Connecticut Digital Archive (CTDA) is UConn's preservation-oriented digital repository offering:

- Long-term data storage and redundancy to comply with national and international standards for digital preservation
- Built-in contingencies for disaster recovery recurring appraisal cycles
- Permanent and citable URIs
- Open access and discovery (with access limits where appropriate)
- “Bit-level” preservation of any non-malicious file type
- Migration paths for common file types.

All content deposited in the repository remains the property of the depositor, who gives UConn the non-exclusive right to preserve and make it available for educational use.
